LETTER OF TRANSMITTAL

April 1984

Mr. Doug Bell
Commissioner of Yukon
Yukon Government
P.O. Box 2703
Whitehorse, Yukon
Y1A 2C6

Dear Mr. Bell:

The Boreal Institute for Northern Studies is pleased to provide this up-date of the Yukon Bibliography for the period 1980-81.

We are grateful for the financial assistance made available from the Yukon Archives, Department of Tourism, Recreation and Cultural Resources, Yukon Government, to partially support this bibliography. Special thanks are extended to the Honourable Bea Firth, Minister, and Terry Weninger, Deputy Minister, Department of Tourism, Recreation and Cultural Resources, and others within the Yukon Government, particularly to Miriam McTiernan, Territorial Archivist, who arranged for Lynn McPherson to gather references from the Yukon Archives library collection and was helpful in many other ways.

The record would be incomplete without particular thanks to Mrs. G.A. Cooke, the Institute's Librarian, who provided the driving force behind the publication, and to her assistant, Irina Singh, who gathered information from the major libraries and other sources, particularly in Alberta.

Yours sincerely,

Robbie Jamieson

INTRODUCTION

This volume of the bibliography essentially covers the year 1981. It contains 462 entries of which over half (236) were published in 1982. There are also 82 entries from 1981, 43 from 1980, 80 from 1970 to 1979, and 21 pre-1970 which were not listed in the previous volumes,[1-9]. The listing includes books, government and consultant reports, theses and items from periodicals; unpublished materials are incorporated only when the present owner has agreed to provide access to the document to any bona fide researcher. Maps, newspapers, airphotos, films and other non-book materials have not been included.

Geographically, the bibliography is limited by the present boundaries of the Yukon. General reference to the "North" is avoided unless it provides a minimum of one chapter or one page in a periodical on the Yukon as a separate entity, or includes data which is difficult to locate elsewhere. The reader should note that the subject division "Neighbouring Territories", P, is composed entirely of cross references from the remainder of the text; no further indexing for areas beyond the boundaries of the Yukon is developed.

This compilation is the result of a broad literature search through library collections and appropriate secondary sources, including on-line databases, references and bibliographies in items, and library accessions lists. A list of sources searched is on page viii and codes used for locations are on page ix. Wherever possible the original document was reviewed. Abstracts are brief and indicative rather than descriptive. They have not been done by a subject expert. Since it is difficult for any bibliography to be complete, the authors would be grateful if any omissions known to the reader were communicated to them.

The bibliography is arranged according to the twenty-two major subject divisions and various minor or specific sub-divisions as presented in the Table of Contents on page iii. Each major subject division is identified by a letter, and individual entries are numbered sequentially and continuously throughout the sub-divisions. Entries within each division and sub-division are arranged alphabetically by author and then title. The arrangement of entries is further illustrated on page x. English translations for titles in other languages are provided when available. Full personal author, corporate author and/or publisher, and subject indexes follow the text. Personal authors are cited by surname followed by their initials as they appear on the original document; thus, some authors are listed with variant initials. Journal names, e.g. Oilweek, used as authors have not been included in the indexes. These entries must be located by searching the respective or applicable subject divisions. To minimize difficulties with abbreviations, full titles for journal references are given with only the bibliographic detail being shortened. Indexing is provided for chapters in books or reports if there is an author, as well as for the item as a whole.

One major change has been made in the compilation, beginning with the 1979 Updates, regarding the arrangement of the materials concerned with pipelines - existing and proposed. All of these items are now referenced or cross-referenced in the "Pipelines" sub-division of the major subject division, "Transportation," Tf. In the compilations before Update to 1979, only existing pipelines were referenced in Tf and, proposed pipelines were referenced in the "Oil and Gas Resources" sub-division, Dg. In addition, specific pipelines are listed in the subject index by name.

The production of this bibliography was greatly assisted by computer programs developed in 1973 by Mr. Adrian Lo[10] under the direction of Professor H.S. Heaps, with funds provided by Donner Canadian Foundation. These programs automatically formulate the main body of the bibliography, automatically compile the author and subject indexes, and give computer-printed camera ready copy for publishing.

Many librarians and interested individuals have helped along the way. It would be impossible to mention them all, but we would particularly like to thank:

Ms. Eileen Edmonds, Librarian, Yukon Archives.

Dept. of Tourism, Recreation, and Culture, Libraries and Archives Branch, Yukon Government, Whitehorse.

Staff, Science and Government Documents Divisions, Cameron Library, The University of Alberta, Edmonton.

Staff, Humanities and Social Sciences Library, The University of Alberta, Edmonton.

The authors also gratefully acknowledge the assistance of Ms. Robin Minion who proof-read the final document, Ms. Vera Raschke who assisted with acquisition of materials, Mrs. Dorothy Loowell who entered the data using a remote terminal, and to Ms. Anita Moore who arranged for the printing and binding.
